

Protective face mask SNAHA model 0250

Antibacterial cotton protective face mask SNAHA

Protective face mask SNAHA type 0250 is designed to **increase user`s hygienic standard**, effectively protects the upper breathing tract, captures the entry of allergens, dust and **prevents of aerosols dissemination**.

Protective face mask SNAHA type 0250 is made from health harmless, anti-allergic and hygienic 100% cotton fabric weight 150g/m² with antibacterial adjustment **SILVERACTIVE**, based on silver ions. The material used for the production of **Protective face mask SNAHA type 0250** was dermatologically tested according to OECD 404 and 406 standards of SANITAZED AG Switzerland, OEKO-TEX Standard 100, class I.

Protective face mask SNAHA type 0250 is manufactured in white color. The face mask can be washed and sterilized at temperatures up to 95°C, the manufacturer of the face mask textile cotton fabric guarantees 100 washing cycles.

Protective face mask SNAHA type 0250 can be made in any color, or with printing or embroidery according to customer requirements (MOQ 10 000 pcs).

Only Czech origin certified materials of the highest quality are used in the production of the **Protective face mask SNAHA type 0250**.

Fastening of the face mask is possible in two versions - with straps or elastic bands (see pictures below).
